SUMMARY

Junior Android Developer with **6 months of professional internship experience** developing scalable Android applications using **Kotlin, XML, MVVM, Clean Architecture, and Dependency Injection**. Experienced in building multiple production-ready apps including **Speak & Translate, Weather, Dictionary, Weight Loss Planner, Spell & Pronounce, and Hadith applications**. Skilled in **REST API integration, Firebase, Java to Kotlin migration, debugging, and performance optimization**. Passionate about building clean, maintainable, and user-friendly Android applications.

EXPERIENCE

Android Developer Intern | **ZeeSoft Tech** | Sept 2025 – March 2026.

- Developed multiple Android applications using **Kotlin and XML.**
- Implemented **Clean Architecture, MVVM, and Dependency Injection** across applications.
- Built **Speak & Translate App** using speech recognition and translation APIs.
- Developed **Spell & Pronounce App** with pronunciation and dictionary features.
- Created **Weight Loss Planner App** with user tracking and goal management.
- Built **Hadith App** with categorized Islamic content and clean UI.
- Developed **Weather App** using REST APIs and real-time weather data.
- Built **Dictionary Application** with search and offline support.
- Converted **Java applications to Kotlin** improving maintainability and performance.
- Integrated REST APIs and improved application performance.
- Debugged issues and optimized UI responsiveness.
- Followed **Clean Architecture and best Android development practices.**

PROJECTS

AI Health & Fitness Tracker | Final Year Project | github.com/saudattari/ | May 2025

- Built AI-powered fitness app with personalized meal and workout plans
- Integrated Firebase Firestore and Authentication
- Implemented AI models and Nutritionix API
- Designed gamified UI with badges, progress tracking, and leaderboards

Speak & Translate App | Internship Project | October 2025

- Developed voice-based translation application
- Implemented speech recognition and translation APIs
- Designed user-friendly UI for learning spelling and pronunciation effectively
- Implemented word input validation and spelling correction features

Weather App | Internship Project | November 2025

- Developed weather application using **Kotlin, XML, MVVM, and Clean Architecture**
- Integrated **REST Weather API** using Retrofit for real-time weather updates
- Displayed temperature, humidity, wind speed, and location-based weather data
- Implemented error handling, loading states, and responsive UI for better user experience

EDUCATION

Bachelor of Science (BS) in Computer Science - Govt College University Faisalabad - 2025 | **CGPA:** 3.76/4.0

SKILLS

Android Development: Kotlin, Java XML, Jetpack Compose, Android SDK, MVVM, Clean Architecture, Dependency Injection
APIs & Backend: REST APIs, Retrofit, Firebase Firestore, Firebase Authentication
Databases: Room Database, Firebase Firestore, SQLite
Programming: Kotlin, Java, Python, OOP, Data Structures
Tools: Android Studio, Git, GitHub, Postman, Firebase Console
